Good morning Scott!

The purpose of this call is to begin a conversation with MPCA on the question of implementing their narrative criteria (no toxics in toxic amounts) for ionic pollutants for aquatic life protection in the absence of numeric criteria for specific constituents. It came up as a result of EPA comments on MN's proposed revisions to its class 3 and 4 standards (comment letter attached). I have an email in to the organizer to ask about whether or not they want NPDES folks present. My sense is that they might prefer to have a smaller focus group for initial feedback.

Dave

Subject: Numeric interpretation of narrative standard discussion
When: Friday, July 13, 2018 10:00 AM-11:00 AM (UTC-06:00) Central Time (US & Canada).
Where: Skype Meeting

Dave, Robie and Aaron,

Thank you for taking the time to meet with us about our thoughts on how to address effects to aquatic life that may be impacted by our revisions to our industrial and agricultural standards. We wanted to share a screen, so let me know if Skype doesn't work for you.

Thanks,

Laura
